

Team10

Project Title: Embedded Machine Learning

Date: 9/27/21

## Members:

James Gossling

Jackson Lopata

Hailey Lucas

Eric Reusch

Francis Mago

Isaac Stich

Christian Williams

## What we've accomplished in the past week/what we've been researching

James Gossling: Continuing Coursera Embedded ML course. Potential project ideation.

Jackson Lopata: Finished week 2 of Coursera course. Brainstormed project ideas

Hailey Lucas: Continued in week 2 of Coursera ML course. Brainstormed 3 ideas for embedded ML project

Eric Reusch: Continued on week 2 of Coursera Course, brainstormed multiple project ideas

Francis Mago: Finished week 2 of the Coursera Course. Brainstormed 3 ideas for potential project ideas.

Isaac Stich: Worked on Coursera Embedded ML course. Brainstorming ideas.

Christian Williams: Finished 2nd week of the Coursera course, began slightly on week 3 and brainstormed 3 ideas for potential projects

## What we're planning to do in the coming week

James Gossling: Narrow down/Choose project. Continue Coursera course. Requirements assignment.

Jackson Lopata: Finish week three of Coursera course, requirements assignment, and select a project.

Hailey Lucas: Finish week 2 of Coursera course. Possibly attend some of the speakers from the links Dr. Rover provided. Work on class assignments and narrow down project ideas.

Eric Reusch: Decide upon what projects will be most feasible to implement and decide on requirements for the project.

Francis Mago: Widdle down project ideas/decide on a project. Complete requirements assignment. Start week 3 of coursera course.

Isaac Stich: Continue working on Coursera Course and Help to narrow down ideas for project.

Christian Williams: Complete the 3rd week of the course and finish deciding the project that we will be doing

### Issues we had in the previous week

James Gossling: None

Jackson Lopata: None

Hailey Lucas: None

Eric Reusch: None

Francis Mago: None

Isaac Stich: None

Christian Williams: None
